

Karndean
Designflooring

Rigid Core

At Karndean we see flooring differently...

We travel the world in our quest to bring you exceptional floors that inspire and delight. From the ancient forests of Europe, to the remote Australian outback and beyond, we seek out expressive and intriguing forms in the natural world to influence our unique floor designs.

By combining these original features with cutting edge design, we create simply beautiful floors that you'll love for a lifetime.

Product overview

We offer three types of product:
Gluedown, loose lay and rigid core.

Below is a guide to which product type may suit your space. Each product offers various benefits for different applications. To find out which product best suits your needs, we recommend you speak to your local flooring retailer.

Gluedown

Our gluedown ranges are individual planks and tiles that are stuck down using permanent adhesive.

-  Wide range of designs
-  Design capabilities
-  No expansion gap required
-  Suitable for any budget

Loose lay

Our loose lay ranges are individual planks and tiles that have a K-Wave friction grip and acoustic backing. Its friction grip backing can be stuck down using a tacky adhesive.

-  Individually replaceable
-  Acoustic qualities
-  Quick and easy to install
-  No expansion gap required

Rigid core

Our rigid core products, are floating floor with a click-locking mechanism that clicks together individual planks. It has an inbuilt acoustic backing that requires no adhesive.

-  Enables preservation of existing floor
-  5G® click-locking mechanism
-  Hides subfloor imperfections
-  Quick and easy to install
-  Acoustic qualities
-  Installs over most existing hard floors

Why Karndean?

All the benefits of Karndean Designflooring...

Realistic designs

Durable

Easy to clean
and look after

Resists indentation

Pet friendly

Kid friendly

Quiet compared to other
hard floors

Waterproof

Environmentally friendly

Compatible with
underfloor heating

K-Guard+

Comfortable underfoot

Lifetime warranty

Hygienic

Installs over most
existing hard floors
and hides subfloor
imperfections

Why rigid core?

Rigid core's unique benefits...

5G® click-locking mechanism

Get all of the benefits of rigid core with the added security of the superior 5G® vertical click-locking mechanism that is backed by our lifetime HoldSafe warranty.

Acoustic qualities

Reduces noise transfer to rooms, making it perfect for upstairs bedrooms, rumpus rooms, attic conversions and apartments.

Enables preservation of existing floor

Because our rigid core products are designed to be installed without glue and in most cases without levelling compounds or underlayments, the existing floor can usually be fully preserved.

Hides subfloor imperfections

Minor subfloor imperfections won't show through our rigid core backing, meaning most installations won't require the use of levelling compounds or underlayments.

Installs over most existing hard floors

Rigid core can be installed over most existing hard floor coverings.

Quick and easy to install

Quick and easy to install with a 5G® vertical click locking system.

Rigid core's premium construction

Clear PVC Embossed Wear Layer
Provides superior protection from everyday wear and tear.

K-Guard+ Surface Protection
Our K-Guard+ surface protection system uses PU technology to provide a hygienic and durable finish.

Stability Layer
This layer assists with dimensional stability and aids indentation resistance and recovery.

High Definition Photographic Layer
Showcasing the unique design of each Karndean product; handcrafted for one of a kind beautiful floors.

5G® Locking Mechanism
Using a single action installation method, the 5G® mechanism allows the installer to quickly click and lock planks together.

Acoustic Backing
Our pre-attached acoustic foam backing makes our rigid core products quieter to walk on than laminate or engineered hard floors, and reduces noise transfer to rooms below.

K-Core Technology
Our proprietary K-Core technology ensures a stronger, more stable core for installation over most existing hard floors without the worry of exposing subfloor imperfections, and it's 100% waterproof.

5G® is a patented technology invented by Välinge Innovation AB. The 5G® word mark and logo are registered trademarks owned by Välinge Innovation AB.

Our Korlok range features 1420mm x 225mm planks with proprietary K-Core technology, a 5G® click-locking mechanism and a specially formulated acoustic backing.

Together these layers form a product that is strong and stable, and able to be installed quickly and easily over most existing hard floors, as well as over imperfect subfloors. Plus, Korlok offers impressive acoustic benefits in reducing noise transfer to rooms below.

Korlok

Korlok

RIGID CORE

Where we sourced our inspiration for Korlok...

Spotted Gum

The Spotted Gum tree flourishes in coastal areas along the Eastern seaboard of Australia, ranging from the mountains of the Great Dividing Range to the sunshine coast of Queensland. Large amounts of sapwood can be seen within the boards and this adds to the blend of features that make the product so distinctive. Even when coloured, the sap creates a tonal plank that will work in all interiors.

Warm Spotted Gum RKP8118
(pg 16)

Weathered Spotted Gum RKP8119
(pg 10, 17)

Weathered Spotted Gum RKP8119

Australian Ghost Gum

These boards were taken from the evergreen, fast growing species that is native to central Australia. The linear grain is caused by the tree's speed of growth and results in beautiful colour variation. This variation in colour hues creates a striking canvas that will add impact in any interior yet will also work with many other objects to create a harmonious space.

Australian Ghost Gum RKP8120
(pg 18)

Butternut

Often referred to as white walnut, the original butternut planks were sourced from the Eastern parts of the United States. Real butternut is even softer than walnut, making it highly impractical when it comes to flooring, but with Korlok you have the beauty of the real wood in a highly durable format.

Washed Butternut RKP8108
(pg 21)

Blackbutt

A quintessential Australian hardwood that takes its name from the lower half of the tree's trunk which is blackened by the fierce forest fires that both destroy, and then renew. These boards were sourced from the very North of New South Wales where thick forests merge with the beautiful coastline. Great care was taken to retain the oozing sap lines that add to the distinctive linear grain and bleed into the timber.

Natural Blackbutt RKP8121
(pg 11, 19)

Smoked Blackbutt RKP8106
(pg 20)

Natural Blackbutt RKP8121

Texas Ash

Ash boards are dominated by an attractive straight grain with just the occasional hint of a flowery grain. In its natural format, the wood is a consistent, neutral colour due to the tree's growth in limestone soil types with very little rainfall.

Canadian Oak

These nature grade planks feature a straight grain detail which is then blended with a small amount of character grade wood to produce a clean, neutral floor design.

Baltic Oak

The distinctive markings of the Baltic Oaks were achieved by mixing grades, from ultra-prime to nature grade boards. The original planks were machine brushed to create a unique open grain and coloured oils were hand applied to create a limed effect.

Painted Acacia

This beautiful species is rarely seen in modern flooring due to its strong colouration and irregular appearance. The natural product is difficult to alter due to its impervious nature, so after a light wire brushing to unearth the internal beauty of this timber, we “painted” the boards to darken and neutralise the original red tones, resulting in a beautiful, unique design that really has the wow factor.

English Oak

This characterful oak was sourced from the ancient British woodland of South Oxfordshire. Its weathered look allows for a muted yet distinctive floor while the tonal variation across the boards creates an appealing blended effect.

Shadow Oak RKP8203
(pg 14, 54)

European Oak

These European boards were hand selected as a trusted raw material and canvas to work with. The light speckling seen within the tight grains occurs due to the rapid dehydration of the boards once felled. We then hand applied coloured oils to produce on-trend colours to complement the existing range.

Nimbus Oak RKP8205
(pg 8, 14)

Carbon Oak RKP8210
(pg 14, 54)

Nimbus Oak RKP8205

American Barnwood

The marvellous rusticity and rotary saw markings of this salvaged American lumber create an unmistakably unique floor with unlimited potential for application. The heavy tonal shifts within this product have been enhanced by layers of natural, hand-applied finishing oils. The lively colours and character shifts generate an eye-catching floor and promote the wood's extreme variation of features, providing a real statement floor for any interior.

Brushed Oak

This batch of European Oak boards were hand selected to create a combination of flowery and straight grain boards and then brushed to heighten this interesting grain pattern. The subtle texture of the original planks, which comes across in the final emboss, adds a subtle layer of detail to the individuality of this product.

Textural variation along the surface of the product can affect nominal values.

Lemon Spotted Gum **SCB-VGW104T**

Our popular Van Gogh collection captures the look of real wood in a variety of colours and designs from traditional rustic to cool contemporary. Large planks, distinctive grain details and a subtle texture create a style that works in any space.

Van Gogh

Van Gogh

RIGID CORE

Where we sourced our inspiration for Van Gogh...

Spotted Gum

Growing at up to 45 metres in height, the iconic Spotted Gum flourishes in coastal areas along the eastern seaboard of Australia, ranging from the mountains of the Great Dividing Range to the sunshine coast of Queensland. The characteristics of this beautiful timber result in easily identifiable flooring planks. The slender trunks have smooth bark, which sheds in patches giving it a spotted appearance. Large amounts of sapwood can be seen within the boards, adding to the blend of features that make the product so distinctive. Karndean Designflooring hand-picked a stunning selection of this timber and applied tonal influences for a timeless floor that suits all interiors.

Redwood

The original inspiration for these Van Gogh designs was American Redwood reclaimed from railway sleepers used in the national rail network. Growing in the foggy coastal forest of the Pacific, these trees are exposed to the salty ocean air and over the years have been able to cope with and withstand the weathering properties of their climate. Embracing the appeal reclaimed woods, our product designers were drawn to the unique detail and texture of the redwood trees, which over the years had aged beautifully. When our Karndean designers got their hands on the original wood, they applied a range of techniques, including sanding it down to reveal the grain details in the timber. Our Van Gogh redwood designs are rustic, industrial looking planks that will give homeowners and designers alike the look of reclaimed woods without the practical drawbacks of real timber such as splintering, cracking and warping.

Oak

The inspiration behind our Van Gogh oak designs was the unique colour of the timber provided by these majestic trees. Sourcing oak originating from the ancient British woodlands of South Oxfordshire, our Karndean product designers were drawn in by the rich hues. However, once they had sanded down and waxed the timber, the true vibrancy of not only the colour, but also the distinctive grain details were brought to life. With five oak designs in our Van Gogh range, we have a design and tone to suit any room.

Van Gogh accessories

To complete your Van Gogh rigid core floor we have five colour coordinated accessories for each design. Our accessories are custom made with unique features such as tapered base plates to suit inbuilt underlay and come in convenient 2.3m lengths for ease of transport and handling. All of our accessories are suitable for residential and light commercial use.

Multi Trim

As its name suggests, the Multi Trim fulfills a number of functions.

1. **Expansion Joint cover.** For installations over 15m in length or width an expansion joint must be made (usually placed across a door opening).
2. **Transition.** For joining to carpet where the trim provides cover for both the expansion gap of the floating floor and protection from the pins in carpet

smooth-edge, as well as normal height transitions.

3. **Reducer/Ramp.** The top cover can be angled to provide a reducer strip down to substrate level, or for adjoining materials of different heights.

This trim comes with three inserts to allow for joining to a range of alternative materials of different thicknesses.

Expansion Joint Cover/Transition

Reducer/Ramp

Edge Cap

Edge Caps are one of the most common profiles.

They can be used for a neat finish against sliding doors, full height floor to ceiling windows, carpets, tiled areas and other floor finishes of similar height. This profile is glued to the floor and the floating floor slots into the trim, it has 19mm top coverage.

Split Edge Cap

The Split Edge Cap is an easier to install alternative to the Edge Cap, especially on that all too challenging last row of planks. The base profile is installed prior to the installation of the floor and then the colour coordinated top cover tapped in to place with a rubber mallet to hide the expansion gap.

A great option for DIY installers, the Split Edge Cap is a great solution for finishing to window frames, sliding doors or as a sleek alternative to traditional Scotia.

Stair Nosing

Stair Nosing is a trim used for finishing of steps and staircases neatly. This trim is fixed to the edge of the step using permanent construction adhesive and mechanically where required.

This is used as a transition trim to join step treads and risers (upright, vertical part of the step neatly). The trim accommodates expansion for both tread and riser.

Scotia

Scotia is designed to cover the gap between the wall and the flooring after the floor has been laid. Our scotia measures 19mm by 19mm and is made from high quality moisture resistant WPC.

It has just the right amount of flexibility to follow any slight inconsistencies in the wall.

Karndean Designflooring offers more than 200 flooring choices across gluedown, loose lay and rigid core formats. Explore our complete range of products inspired by the look and texture of natural woods and stones.

Transferable Purchase Warranty

If you purchased your Karndean Designflooring through a Karndean Retail Partner your warranty will have the added benefit of it being transferable. This means that if you sell your house within your guarantee period, you can pass the warranty on to the new owners.

To qualify for a transferable warranty, you must:

- Adhere to the terms and conditions outlined in the Purchase Warranty
- Purchase from one of our retail partners and they will provide us with your email address to enable us to send you your transferable warranty

For more information or to obtain your Purchase Warranty, please speak with your local flooring retailer or contact our **Customer Service Team**.

The lifetime residential warranty is defined as 35 years and protects against product wear out and manufacturing defects. What's more, the warranties are now transferable to any future owners

(subject to the terms and conditions of the Transferable Purchase Warranty).

Cleaning and maintaining your Karndean floor

Karndean Designflooring is hardwearing and easy to look after. Our enhanced surface treatment helps protect against everyday wear, spills and scuffs. This makes it easier and more environmentally friendly to clean and maintain, giving you peace of mind that your Karndean floor will look great for years to come. We have a dedicated section on the website with videos which explain how best to look after your Karndean floor and covers lots of frequently asked questions from our customers.

Visit www.karndean.com/cleaning for more information. We also have our own Floor Care Kits that you can order from your local retailers including everything you need for a simple cleaning routine.

Inside your Floor Care Kit

Regular cleaning with a pH neutral cleaner such as Karndean Clean will help keep your floor at its best.

Over time you may want to treat your floor to some extra care. We recommend every six to twelve months, depending on wear, that you strip and refresh your floor using Karndean Remove and Karndean Refresh, to further enhance its look and durability.

Environmental

Karndean Designflooring and the environment

At Karndean Designflooring we find inspiration for our products in the beauty of the natural world and feel passionate about bringing this into every product we create. In order to keep our environment protected we do everything we can to continuously improve our manufacturing processes to ensure sustainability whilst delivering best value. We have always aimed to make stylish and durable floors with the lowest possible impact on the environment, and have never had to compromise quality or performance in order to comply with legislation or meet environmental requirements.

Karndean Designflooring is a member of the Green Building Councils of Australia and New Zealand and complies with their requirements under GreenStar. All Karndean products and accessories are manufactured in facilities certified to the ISO 14001 Environmental Management and ISO 9001 Quality Management International Standards. Our approach is based on the use of recycled materials in our floor coverings and ensuring that the finished product is suitable for recycling if required.

What's more...

- All of our packaging is made using recycled material, which we continually review to ensure that it is environmentally friendly and fit for purpose
- We use individual logistical solutions to efficiently and effectively transport our products
- Our storage facilities use high density racking to maximise capacity and minimise impact
- Our offices are introducing innovative energy saving techniques
- We are members of the Green Building Council Australia (GBCA) and Green Building Council New Zealand (NZGBC)
- Our products qualify for eco-points towards GreenStar building projects
- All of our adhesives are water based, solvent-free, have low VOC emissions and are GreenTag certified

GreenStar GreenTag™ certified

The majority of Karndean luxury vinyl ranges are fully certified to Global GreenTag, the third party multi-criteria, consensus based and externally verified Type 1 eco-labelling program. This is one of the largest product sustainability certification systems in Australasia and the only certification mark approved by the Australian Competition and Consumer Commission (ACCC).

GreenTag comprises two certification systems and the majority of Karndean Designflooring luxury vinyl is certified under both.

LCARate™

Life Cycle Analysis is for all products and all rating tools that engage LCA with separate output called an Environmental Product Declaration (EPD), which is a summary LCA report used for certain credits in some rating tools for GreenStar.

GreenRate™

GreenRate is a straight Type 1 eco label developed to meet the requirements of specific green building rating tools. It includes indoor environmental air quality: volatile organic compounds compliant (IEQ VOC) and reduced exposure to pollutants. GreenRate is offered in three levels of quality from Level 'C' up to Level 'A' relevant to GreenStar in Australia and New Zealand.

Karndean Designflooring LVT ranges and adhesives are fully certified under GreenStar GreenRate Level 'A', plus under international FloorScore Indoor Air Quality Certification for low emitting VOC's. Also certified to LCARate "silver streamline".

Learn more and download Karndean Designflooring's GreenTag certificates on our website.

Imagery and Design Reproduction

Photography and print cannot always produce a perfect representation of our products. This includes colour, pattern variation and installation elements used. For this reason we strongly recommend obtaining a product sample and where possible viewing a larger sample in-store. We also recommend visiting our website for information on installation, after care and product selection: www.karndean.com/advice. We love developing new ideas and improving on our existing designs which means that sometimes products are withdrawn at short notice. We hate to disappoint and will work with you to find an alternative design. Please contact Customer Services for more information.

* Please note that as a feature of the design these products incorporate a high colour variation between individual planks.
