Outside beauty perfected for inside performance

"Quick-Step sets a new standard for timber floors by combining natural, authentic beauty and next-level performance. The result is a floor designed to be admired and enjoyed for life."

JOYCE VAN WAELEGHEM, CHIEF DESIGNER AT QUICK-STEP

Joyce Van Waeleghem, Chief designer at Quick-step

BRINGING NATURE HOME

"More than ever, home is the place where we can unwind and be ourselves. By bringing nature into our homes – in the form of plants and other materials like wood and stone – we can create a stress-free and tranquil atmosphere. More and more, we strive to dissolve the boundaries between the inside and outside."

AUTHENTICITY, IMPROVED

"When it comes to adding a touch of nature to your home, nothing beats a timber floor. Because every plank is unique, the sense of authenticity is immediately apparent. On top of that, a timber floor is a smart investment; it immediately increases the value of your property.
To make the natural beauty of our floors stand out even more, Quick-Step combines unique colour tones and finishes with specific gloss levels. Intense, warm tones are enhanced with soft but clearly present
textures to further liven up your floor."

"A QUICK-STEP TIMBER FLOOR COMBINES NATURAL BEAUTY WITH NEXT-LEVEL PERFORMANCE AND INCREASES THE VALUE OF YOUR PROPERTY."

"IF YOU'RE OPTING FOR A TIMBER FLOOR, YOU'LL WANT TO RETAIN ITS AUTHENTIC BEAUTY FOR AS LONG AS YOU CAN. TIMBER FLOORS FROM QUICK-STEP HAVE BEEN DESIGNED WITH EXACTLY THIS IN MIND, AND WITH THE AIM OF CREATING WARMTH IN THE HOME FOR MANY YEARS OF ENJOYMENT WITHOUT WORRY."

Timber **without** Surface & Edge Protect+ technology

Timber **with** Surface & Edge Protect+ technology

MAXIMUM PLEASURE, EASY MAINTENANCE

All Quick-Step timber floors are finished with an advanced lacquer to give your floor added resistance to wear, marks and scratches. The water-repellent Protect+ technology also helps to prevent water, dirt and grime from being trapped in the open grain or penetrating between the joints of your floor. This helps to keep the planks looking as good as new. Thanks to the unique combination of this technology and our authentic floor designs, you will be able to enjoy your floor's beauty for years to come.

"NOW, YOU CAN HAVE AN AUTHENTIC TIMBER FLOOR WITHOUT MANY OF THE CONCERNS THAT COME WITH IT."

WORRY-FREE AUTHENTICITY

"Nowadays, timber floors with distinct, four-sided bevels, matt finishes and pronounced textures and pores are becoming more popular. However, these floors are also much more sensitive to dirt and stains. That's why we developed a solution."

"Matt finishes, deep textures and structures make it difficult to protect all the pores, small cracks and other structures in the wood. This causes moisture to be absorbed and fine dirt and dust particles to get trapped in the texture. Over time, these particles can make your floor look dirty – even after cleaning. Another well-known issue is water or other liquids soaking through the edges of the planks. This results in a stain that can eventually turn black and even mouldy when left uncared for. When that happens, the only option is to resurface or even replace the floor, which takes time and is expensive."

"To prevent this from happening, we developed a new lacquer technology that keeps your floor looking beautifully natural. This improved protection lets you remove dirt and moisture faster and easier than ever and makes sure it doesn't seep into the wood. This means a floor that will look great for years to come. With this technological improvement, Quick-Step sets a new standard in timber flooring. Now, you can have an authentic timber floor without any of the concerns that come with it."

BEAUTY COMES IN MANY SIZES

Details make all the difference

The beauty of nature lies in its variety and detail, and that is exactly what the Quick-Step Timber range offers as well. By choosing Quick-Step, you're inviting nature into your home to create a unique, authentic look. Thanks to our highly resistant lacquered floors, you'll be able to enjoy your timber floor for years to come, without having to worry.

Types of wood

Blackbutt

Blackbutt is an Australian hardwood with excellent hardness. It may contain prominent gum veins, insect marks as well as some fine surface cracks. Not recommended with heated subfloors

Tasmanian Oak

Tasmanian Oak is a blend of pink/straw coloured hardwood species of moderate hardness from Tasmania. Some small surface splits or surface checks are an occasional characteristic of Tasmanian Oak.

Spotted Gum

Spotted Gum is an Australian hardwood with wide colour variation and excellent hardness. It may contain some fine surface cracks. This wood species is not recommended with heated subfloors.

Sydney Blue Gum

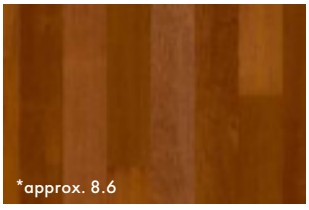
Sydney Blue Gum is an Australian hardwood with wide colour variation and moderate hardness. This wood species often contains a variety of dark borer marks and trails.

Jarrah

Jarrah is a very durable hardwood from WA, which ranges in colour from pale pink/grey to deep reds. It will darken, turning a deeper red and more uniform in colour.

Oak

European Oak is extremely popular and ranges in colour from pale straw to mid brown. Knots and medullary rays are a real feature of this stunning hardwood.



Merbau

Merbau is a reddish brown hardwood of excellent durability from South East Asia. It often contains a small yellowish fleck in the grain.

*Hardness Janka rating

The rating is a measure of the resistance of the wood to indentation. The higher the number, the more indentation resistant the timber.

Grading

All Australia wood varieties are graded as per AS2796 Standard and better. This grade includes knots, gum veins, fine cracks and other natural features of Australian Eucalypts. For oak our grading system sorts our floors into three different categories: nature, marquant and vibrant.
Although each plank is unique, it gives you an idea of the overall look of your floor.

NATURE

Small knots for a subtle look.

Colour variaton	
Knots - EN1310	Max. 20 mm
Cracks	

MARQUANT

More pronounced knots for a rustic appearance.

Colour variaton	
Knots - EN1310	Max. 50 mm
Cracks	

VIBRANT

Large knots and cracks, for a floor with character.

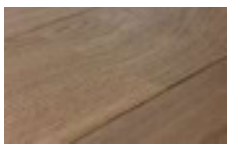
Colour variaton	
Knots - EN1310	Max. 80 mm
Cracks	

Treatment

Craftsmanship allows us to add extra texture to our timber floors and create a wide range of styles.

(DEEP) BRUSHED

Brushing accentuates the natural grain structure of the wood plank and adds depth.



RECLAIMED LOOK

Some of our pattern floors have a reclaimed look marked by handsanded surfaces with subtle saw cuts, height differences and gaps.

NATURAL KNOTS

Knots are a natural part of wood and emphasize its liveliness. By incorporating knots with a subtle sunken surface, we accentuate the authentic look of our floors, creating more depth as well as an aged look.

DESIGN COLOURS

By using different treatment techniques such as fuming and reactive staining, each plank has an intense and unique colour.

SAW CUTS

Random saw marks show craftmanship and character of the timber planks.

TIMEWORN

A soft hand-scrapped surface, creates contoured boards and bevels for a time worn look and feel.

INT4097

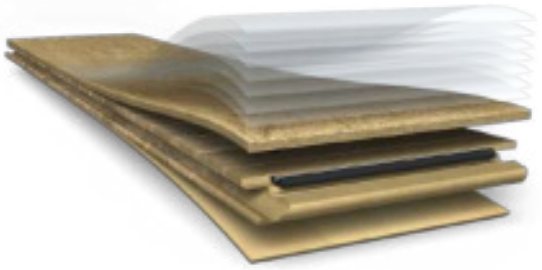
Finishing

All Quick-Step Timber floors are prefinished, which means no oiling or lacquering is needed right after installation. "The protection ensures your floor will still look beautiful after years of use.

Extra matt finish	
Matt finish	
Low sheen	
Gloss	

LACQUERED TIMBER

Quick-Step's high quality lacquer ensures superior protection from dirt and wear, keeping your floor looking better for longer.



There is no substitute for quality

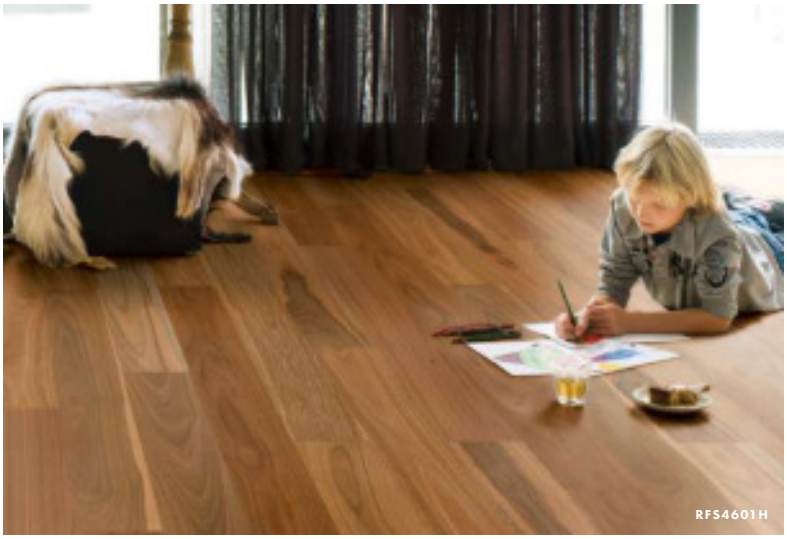
When looking at any pre-finished timber floor it is important to pay serious attention to the wear resistance of the coatings used. After all, it is the coating that will afford protection to the timber surface of your floor and the better the quality of the finish used, the longer your floor will look its very best.

Wear resistance, or abrasion resistance, is tested using a taber abrasion machine that simulates day to day wear of the coating system. Taber testing is universally recognised as the best testing method to evaluate the wear performance of a floor covering. In essence, the better the abrasion resistance, the longer your floor will hold its initial gloss level and the longer the coating will last before wearing through to raw timber.

Most competitors use a standard "off the shelf" finish that wears reasonably well, but that's simply not good enough for the designers at Quick-Step.

SRT Finish is a specifically formulated, high performance lacquer that has been developed in Europe and used on all lacquered Quick-Step Timber floors. Laboratory tests clearly demonstrate that Quick-Step's SRT Finish outperforms the competitors, ensuring that when you choose a Quick-Step floor, you are selecting a timber floor with only the best available pre-finished coatings available. What's more, SRT is able to be re-coated using a wide selection of local finishes, meaning trouble free maintenance when it comes time to replenish the coated surface of your floor in years to come.

Choose your Timber floor



Readyflor XL

Long & extra wide Australian timber planks with timeworn surface.
Grading per AS2796 standard and better.
Up to 4 shorter boards per pack.

UNICLIC PATENTED TECHNOLOGY

Please note: Many 1 strip products feature shorter boards. At Quick-Step, we know that when you want a stunning 1 strip floor, you don't want it full of short boards, that's why we have produced longer boards than almost every other brand, to give you the look you want. Our balance of short boards adds authenticity to your floor. This costs a little more, but looks so much better. Another great reason to buy a Quick-Step floor.

Easy installation

Floating or glued down: the choice is yours

When laying your new Quick-Step Timber floor, you can opt for floating or glued-down installation. For floating installation, picking the right underlay is an absolute must, as it will have a major impact on the final look, quality and comfort of your floor. You can also opt for the 'glued-down' method. In that case, all you need is our Quick-Step Parquet Glue.

Quick•Step® underlays

For a floating installation, choosing the right underlay is key. Quick-Step's easy-to-install underlays provide a stable base for the Uniclic® and Uniclic® Multifit systems. They also:

- level the subfloor and smooth out small irregularities;
- provide excellent acoustic insulation and reduce creaking noises;
- are compatible with traditional underfloor heating and/or cooling.

COMBI-LAY STANDARD

Thickness: 2 mm Roll: 20 or 50 m²

Combi-Lay Standard is no normal underlay. The dense, closed cell polyolefin foam provides excellent support, with good reduction of both reflected and impact noise.

Reflective walking sound ✓✓
Impact sound ✓✓
Integrated Damp Proof ✓✓✓✓

QUIET-STEP COMBI-LAY

Thickness: 2 mm Roll: 20 or 50 m²

Quiet-Step Combi-Lay is the first choice where a quiet step sound and maximum reduction in multi-storey noise is required. This high density underlay has no match when it comes to reducing foot fall noise, with a reduction of up to 30% over standard underlays.

Reflective walking sound ✓✓✓✓
Impact sound ✓✓✓✓
Integrated Damp Proof ✓✓✓✓
Floor heating OK

Glued-down installation

If you prefer a glue-down installation, we suggest using dedicated Quick-Step Parquet Glue for the best results. The benefits of a glued-down floor:

- reflected walking sound is reduced to a minimum;
- maximum adhesion, even in humid conditions;
- allows your floor to breathe and expand with temperature variations;
- maximises your return with floor heating systems.

QSWGL16

PARQUET GLUE

16 kg for ±16 m²

Installation tools

QSTOOLA

INSTALLATION SET

Tapping block: to easily click planks together. **Cramp iron:** to click planks together in hard-to-reach places. **Spacers:** to provide an expansion joint (8 to 12 mm) between walls and floor.

QSTOOLSAW

HANDSAW

With the help of the Quick-Step hand saw, floors can be fitted perfectly underneath door frames.

Finish in style

Why choose Quick•Step® scotia and profiles?

CLOSELY MATCHING COLOURS

Our skirtings and profiles closely match the colour of every floor.

REAL VENEER SURFACE

An authentic wood experience in the entire room.

QUICK•STEP® WARRANTY

They come with the same warranty as the floors.

Scotia

SCOTIA

240 x 1.7 x 1.7 cm

The veneer timber scotia is perfect for covering expansion gaps along skirting boards.

FLEXIBLE PAINTABLE SKIRTING

700 x 1.4 x 4 cm (to be cut to the desired length)
Installation method: high tack hybrid adhesive

A beautiful finish for round pillars or curved walls.

WANTED
VAR3448H

Profiles

Incizo® profile: 1 profile, 5 applications

Quick-Step's Incizo® profile is a multifunctional finishing tool that can be used to finish your floor and stairs in matching colours. Simply cut the Incizo® basic profile to desired shape with the supplied Incizo® knife.

INCIZO® PROFILE

215 x 5.4 x 1.7 cm
Contents: 1 Incizo® profile, 1 Incizo® knife, 1 plastic rail.

APPLICATION 1

Connect two floors of different heights.

APPLICATION 2

Connect two floors of the same height.

APPLICATION 3

Finish your floor along walls or windows.

APPLICATION 4

Create a nice transition between your timber floor and other flooring types.

APPLICATION 5

The Incizo® profile also allows you to finish your stairs in the flooring of your choice. For this application you need the Incizo® profile and an aluminium sub-profile.

INCIZO® ALUMINIUM SUB-PROFILE FOR STAIRS

215 x 7.35 x 1.9 cm

Keep your floor in top condition

EASY MAINTENANCE FOR MAXIMUM VALUE

Quick-Step cleaning products are specifically developed for our floors. They cleanse the surface thoroughly and safeguard its original appearance to maximise that 'new floor' experience. No residual layers are left behind. As always, carefully follow the maintenance instructions for best results

QSCLEANING1000

CLEANING PRODUCT 1L

Specially formulated cleaning product for easy and effective cleaning of Quick-Step floors (1000 ml).

QSSPRAYKIT

CLEANING KIT

Mop holder with water tank and handy lever to easily moisten and mop your floor. Also includes a cleanable microfibre mop and one litre of Quick-Step cleaning product.

QSSPRAYMOP

CLEANABLE MICROFIBRE MOP

Washable, replacement microfibre pad for the Quick-step spray mop. Please do not wash with fabric softener.

QSREPAIR

REPAIR KIT

Light damages can easily be repaired in the original colour with the Repair Kit. Simply recreate the colour of your damaged planks with one of the seven wax pieces selected to cover all Quick-Step colours.
Check the specific colour combination for your floor on www.quick-step.com.au

Tips to keep your floor in top condition: Placing dirt trapping mats at external entrances and felt floor protectors under all furniture is recommended.
Where possible, use rubberised castors and wheels designed for hard flooring and vinyl chair mats under castor wheels and office chairs. Remove small stones and grit with a soft bristle broom or vacuum to help prevent scratching. Quick-Step Timber should also be protected from excessive heat and sunlight. The use of steam mops and stiletto heels should also be avoided at all times. For regular maintenance, use the Quick-Step Timber Cleaning Kit for best results.
(For full maintenance guidelines go to www.quick-step.com.au)

Setting the stage for sustainability

Everyday, UNILIN - the company behind Quick-Step - pushes the boundaries of what it means to be a flooring brand. Apart from making our floors as beautiful and enduring as possible, we also strive to make them as sustainable as possible, and to minimise our ecological impact in every way we can. Just like you, we are convinced that a world of beauty is a world where we respect and treasure our natural resources.

"Sustainability has become indispensable for doing business. That's why we strive to make our floors as sustainable as possible and to minimise our ecological impact in every way we can"

TINO MULLE, CHIEF SUSTAINABILITY OFFICER AT UNILIN

This means we're not just mindful of how we source our raw materials, but also how we provide energy for production. In many UNILIN factories, end-of-life wood waste is the primary energy source.

GETTING THE MOST OUT OF EVERY TREE

In every Timber floor we produce, we strive to get the most out of every single tree. Our goal is to create the authentic feeling of pure oak and Australian timber while maintaining extremely high standards for sourcing and logging. Furthermore, by making our floors as wear resistant as possible, we aim to maximise their lifespans.

- ☑ More than 75% recycled, sustainable wood
- ☑ We use carefully screened raw materials
- ☑ We invest in energy-efficient production

THE CREDENTIALS OF OUR FLOORING

To provide you with maximum value, Quick-Step Timber floors adhere to the most stringent quality and sustainability labels.

PEFC

An internationally recognised label that ensures that the wood we use in our flooring comes from sustainable managed forests.
